

Implementation Record

1. What relevant learning activities did I undertake that apply to this *Implementation Record*?

Check appropriate Learning Records. You must select one or more of the following COMPLETED Learning Records that are relevant to your implementation objective. Your implementation must be directly related to a minimum of 1 CEU of learning activities completed within the current CE cycle.

	Learning Record Title	CEUs
✓	Sterile product preparations course – Day 1	7
✓	Sterile product preparations course – Day 2	7
✓	Sterile product preparations course – Day 3	7
✓	CSHP compounding guidelines	1
✓	Policies and procedures (aseptic technique)	1
<input type="checkbox"/>		
<input type="checkbox"/>		
<input type="checkbox"/>		

Additional learning activities that are relevant but completed in the previous CE cycle (optional)

CEUs completed in the previous CE cycle do not count towards the minimum 1 CEU requirement

2. What was my implementation objective? (SMART format)

Consider: What learning did I apply to my practice? How did I put this new learning to use? Who was the intended audience? How did I know I achieved my implementation objective (i.e., what was the outcome)? What supporting documentation am I uploading?

By October 1, 2016, I will use my newly reinforced sterile compounding knowledge and skills and demonstrate how to clean and disinfect a Primary Engineering Control device. My site certifier will validate my skills using the Practical Certification Checklist.

3. To which domain did this objective relate?

Select at least one:

- Pharmacy practice, including but not limited to patient care practice
- Medication/device knowledge
- Systems-based practice, including collaboration and patient safety

4. What prompted me to implement this into my practice?

Select at least one:

- Acquired knowledge, skill or ability in this CE Cycle
- Completion of one of the tools in the ACP self-assessment module
- Addressed issues regarding specific patient cases or practice-related problems
- Requested information from patients, colleagues, or other health professionals
- Updated practice or clinical guidelines
- Modified regulatory or policy-related environment

- Received feedback from ACP on my past *Learning or Implementation Records*
- Participation in writing, research, teaching
- Other (please specify):

5. A brief description of why I chose this implementation objective (including the knowledge or skill that I applied or implemented), and how it is relevant to my professional practice.

Consider: What was my rationale for choosing this objective? Did I identify a gap or need in my practice? How does this objective relate to my overall professional practice? How would this objective benefit me and/or my audience?

After completing the Practice Self-Assessment, I decided to reinforce my knowledge of USP Chapter 797 and the concepts around aseptic compounding and technique and completed a sterile compounding course. Although I believed I was competent in my skills, I do prepare sterile products on a regular basis and it was important to ensure that my practice was still in accordance with USP Chapter 797 to ensure patient safety. Additionally, as indicated in USP Chapter 797, all compounding personnel should have their aseptic technique and related practice competency evaluated on a regular basis to ensure proper aseptic work practices. This course reinforced my compounding knowledge and skills and I wanted to have my newly reinforced skills assessed through my annual certification of aseptic technique.

6. The steps I took to achieve my implementation objective, including details such as timelines, the audience, people involved and my role if it was a team effort.

- Aug 16-18: Completed the Sterile Product Preparations course
 - Aug 29: Reviewed CSHP compounding guidelines and our policies and procedures
 - Sept 3: Discussed my objective with my site certifier and scheduled my annual certification of aseptic technique
 - Sept 15: My site certifier used our “Practical Certification Checklist” to complete the assessment; I demonstrated my process in the clean room:
 - Wore the appropriate attire for working in the clean room
 - Donned gear in the proper order
 - Demonstrated proper hand washing technique
 - Cleaned the hood in the proper order and with the appropriate methods
 - Sept 15: Upon completion of the assessment, I reviewed the results with my site certifier; I was satisfactory in all of the required tasks and obtained 100% on the Practical Certification Checklist; we signed the checklist as part of my annual validation

7. a) What was the outcome of the implementation?

Select one:

- Improvement in practice, organization and/or delivery of care
 - Collaborated with the pharmacist to support patient care
 - Developed, implemented, and/or evaluated a policy, procedure, tool, or program
- Transfer of knowledge, skill or ability to patients or other health professionals
 - Contributed to a health promotional activity and/or educated a patient or another health professional
- ✓ Peer verification of my competence
 - Performed a new/reinforced skill or technique and demonstrated competence to a peer

b) Explanation of my selection (7(a)) above:

Consider: Explain how the outcome resulted in an improvement to my practice/organization, a transfer of knowledge, and/or a demonstration of my professional competence.

As part of the annual certification process, I successfully demonstrated competence in my aseptic technique by achieving 100% on the Practical Certification Checklist; this was validated by my site certifier.

8. a) One piece of documentation that provides evidence of my implementation.

Upload Supporting Documentation

b) Which of the following best describes the documentation that I am uploading?

Select at least one:

- Records of care with, all identifying information removed
- Education tools, resources, poster, article, paper
- Presentation, facilitation documentation
- Policies and procedures
- Peer Verification of Skills form
- ✓ Other (please specify)

Practical Certification Checklist

c) Explanation of the documentation that I am uploading (optional)
