

# Declaration for compounding services

Updated January 2025

According to the Standards for the Operation of Licensed Pharmacies, a licensee provides access to compounding services that are appropriate, safe, and high quality.

- A licensee must provide patient access to compounding services
  - by **directly compounding preparations** in the licensed pharmacy in accordance with standards approved by the college respecting the compounding of sterile and non-sterile preparations; **or**
  - through an agreement with a pharmacy issued a compounding and repackaging licence that is in a form that meets the requirements of the Pharmacy and Drug Regulation.
- The licensee must still ensure that the compounds prepared by a pharmacy the licensee has entered into an agreement with are prepared in accordance with the standards approved by the college respecting the compounding of sterile and non-sterile preparations.

## Obtaining compounded and repackaged drug products

- A licensee of a community or satellite pharmacy protects patients by obtaining compounded and repackaged drug products only in accordance with the legislative framework.
  - A licensee must ensure drug products obtained from a pharmacy with a compounding and repackaging licence are compounded or repackaged in accordance with the legislative framework including under any agreements required by Council and prepared and distributed to the licensed pharmacy under conditions that ensure the products' security and integrity, the privacy of the receiving patient, and delivery within a timeline that meets the patient's needs.
  - The licensee must still ensure that a patient receiving compounded or repackaged drug products is assessed in accordance with the Standards of Practice for Pharmacists and Pharmacy Technicians.

As the licensee of \_\_\_\_\_, \_\_\_\_\_,  
(pharmacy name herein referred to as the "Pharmacy") Licence number

I am notifying the Alberta College of Pharmacy (ACP) that the Pharmacy will not be directly compounding any preparations onsite and all compounding services will be provided through an agreement with a pharmacy issued a compounding and repackaging (C&R) licence.

I, \_\_\_\_\_, declare the following:  
(licensee name)

- \_\_\_\_\_,  
(pharmacy name) Licence number

will not provide compounding services by directly compounding any scheduled or unscheduled non-sterile or sterile preparations in the Pharmacy.

- I acknowledge and will ensure the Pharmacy complies with the following condition that will be imposed on the pharmacy licence:
  - Cannot directly compound preparations onsite.
- The Pharmacy will provide patients access to compounding services by maintaining a **current and valid** agreement with a pharmacy that has been issued a C&R licence.

- I acknowledge that, as licensee, it is my responsibility to ensure that the compounds prepared by the C&R pharmacy are prepared in accordance with compounding standards and that our Pharmacy completes a final check prior to dispensing the compounded medication to the patient.
- At the time of this declaration, the Pharmacy has an agreement with the following C&R pharmacies (list all):

1. \_\_\_\_\_  
 C&R pharmacy name Licence number

\_\_\_\_\_ Licensee's ACP registration number  
 C&R pharmacy's licensee name

2. \_\_\_\_\_  
 C&R pharmacy name Licence number

\_\_\_\_\_ Licensee's ACP registration number  
 C&R pharmacy's licensee name

3. \_\_\_\_\_  
 C&R pharmacy name Licence number

\_\_\_\_\_ Licensee's ACP registration number  
 C&R pharmacy's licensee name

- I acknowledge that I must notify the college in writing if I would like the registrar to consider removing this condition. Prior to compounding onsite, the Pharmacy must meet all standards to perform compounding and may be required to apply for a renovation.
- I acknowledge that the registrar will rely on the truth and accuracy of information submitted. Any false or misleading statements or representations made to the registrar may constitute "unprofessional conduct" or "proprietary misconduct" and may result in a referral to the complaints director of the ACP.

By adhering to the conditions outlined above, the Pharmacy will not compound directly in the Pharmacy. The Pharmacy has, and will maintain, an agreement(s) with a pharmacy that is issued a C&R licence, and all compounding services will be provided in accordance with the C&R agreement.

I make this professional declaration conscientiously believing it to be true.

Declared this \_\_\_\_\_ day of \_\_\_\_\_, 20\_\_\_\_  
 (month)
