

## Sterile compounding floorplan preliminary questionnaire

To ensure we can properly assess your sterile compounding floorplan, please complete this form.

\_\_\_\_\_  
Pharmacy name

\_\_\_\_\_  
License number (if applicable)

\_\_\_\_\_  
Pharmacy licensee

\_\_\_\_\_  
Licensee's registration number

### Sterile compounding information

Types of compounds being made (check all that apply):

non-hazardous

hazardous

Level of risk (check all that apply):

low

medium

high

List of compounds that you plan to sterile compound.

### Facilities and equipment

Number of anterooms

Are the anteroom(s) shared?

Yes

No

Identify the specifications for each anteroom.

- ISO classification

- pressure differential goal relative to non-controlled area adjacent to the anteroom

- air changes per hour goal

- location of intake and return air vents

Number of clean rooms

Identify the specifications for each clean room.

- ISO classification

- pressure differential goal relative to the anteroom

- air changes per hour goal

- location of HEPA filters

- location of intake and return air vents

List and describe equipment (e.g., PEC (and distance between if more than one), sink controls, PPE storage).

Describe room specifications and set up (e.g., line of demarcation, flooring and ceiling material, pass-throughs).

## Training

### Sterile compounding supervisor

\_\_\_\_\_

Name

\_\_\_\_\_

Registration number

List other personnel who will be involved in sterile compounding (include their names and registration numbers).

Describe the sterile compounding training and sterile compounding experience.

For further information, refer to the [sterile compounding](#) webpage on the ACP website. Sterile compounding services must not be provided until an inspection occurs and any identified deficiencies are corrected.

Only pharmacists or pharmacy technicians can sterile compound in Alberta and only after they have completed training, as per 5.1.2.2 of the [NAPRA Standards for Pharmacy Compounding of Hazardous Sterile Preparations](#) and [NAPRA Standards for Pharmacy Compounding of Non-Hazardous Sterile Preparations](#).
